

1. What is Django REST Framework (DRF)?

DRF is a powerful and flexible toolkit for building Web APIs in Django.

2. What are the key features of DRF?

Serialization, authentication, permissions, throttling, viewsets, routers, etc.

3. What is a Serializer in DRF?

Serializers allow complex data such as querysets and model instances to be converted to native Python datatypes.

4. What is a ViewSet?

ViewSets define the logic for handling requests to API endpoints.

5. What are Routers in DRF?

Routers automatically create URL confs for ViewSets.

6. Sample DRF Question 6
